Education

Bharati Vidyapeeth College of Engineering for Women, Pune
Bachelor of Information Technology

2023 – 2026
CGPA: 9.60/10.0

Experience

Research & Development Intern | Central Water & Power Research Station, Pune Jun'25 - May'26

AI-Powered Smart Energy Management System for Electrical Substations

[Repo]

- Codeveloped a hybrid **GRU-Autoencoder** model to detect technical power losses in electrical substations by analysing **77,000+** real-time **SCADA** records from 3 substations.
- Built a monitoring dashboard using **React.js** integrated with the model pipeline via a **Flask REST API** for real-time visualization, power loss monitoring & alert history logging.
- Structured a **MongoDB** backend for persistent time-series **SCADA** data and alert management.

Cloud Computing Intern | KasNet Technologies Pvt. Ltd., Pune

Jan'25 – Feb'25

- Reduced manual reporting time by **40%** by designing a **Power BI** dashboard analyzing **10,000+ records**; deployed solutions using **Microsoft Azure** (VMs, Blob Storage, Functions), improving scalability and reducing deployment errors.

Projects

Track-It - Git-Inspired Version Control System

[GitHub]

Tech Stack: Node.js, React.js, AWS S3

- Built a Git-inspired **CLI** and Responsive **React.js** dashboard (deployed on **Vercel**) supporting init, add, commit, push, pull, and revert workflows, with commit-history browsing and file management.
- Architected **cloud-backed** version control by syncing commits to **AWS S3**, implementing a revert mechanism with full audit-trail preservation for safe rollback

ScribbleNet - Distributed Multiplayer Drawing Game

[GitHub]

Tech Stack: Node.js, Express.js, WebSocket

- Built a real-time multiplayer game using **WebSocket**-based communication and **distributed systems** concepts (centralized coordination, state sync, broadcast/unicast messaging) to keep concurrent players consistent.
- Integrated the **Claude API** for AI-generated word prompts and hints, enhancing gameplay variety.

Technical Skills

Programming Languages : Java, C, C++, JavaScript, Python

Web Development : React.js, HTML, CSS, Node.js, Express.js, REST APIs

Databases : MySQL, MongoDB

Cloud & Tools: Microsoft Azure, AWS S3, GitHub, Power BI

Core CS : Data Structures & Algorithms, OOP, Computer Networks, Operating Systems

Achievements & Certifications

- Final year project **selected as TOP-50 projects** nationwide through NES Innovation and received **special recognition award** as "All Women Innovators Team"
- **Copyright Registration** for AI-Powered Smart Energy Management System architecture.
- Microsoft **Azure AZ-900** Certified.
- Oracle **APEX Cloud Developer** Certified Professional.
- Contributed to **Open Source** projects through GSSoC'25 and got 4+ PRs successfully merged.
- **Vice Chair**, ACM-W Student Chapter -Coordinated chapter activities.
